

Maximizing the Value of Your Solar Plants

Conergy Operations & Maintenance: Redefining and Transforming Your Business

Conergy's Operations & Maintenance Portfolio provides operational and commercial asset management services for utility scale solar plants (covering traditional PV, PV + Storage, PV Hybrid, microgrid PV, floating PV) and wind farms by applying state-of-the-art processes and tools.

We offer all the relevant O & M support services for a power plant from remote monitoring and analysis, technical on-site management and commercial asset management.

These services are delivered in real time by our team of local and regional solar operations experts, using a framework of consistent methodology which is applied with rigorous discipline.

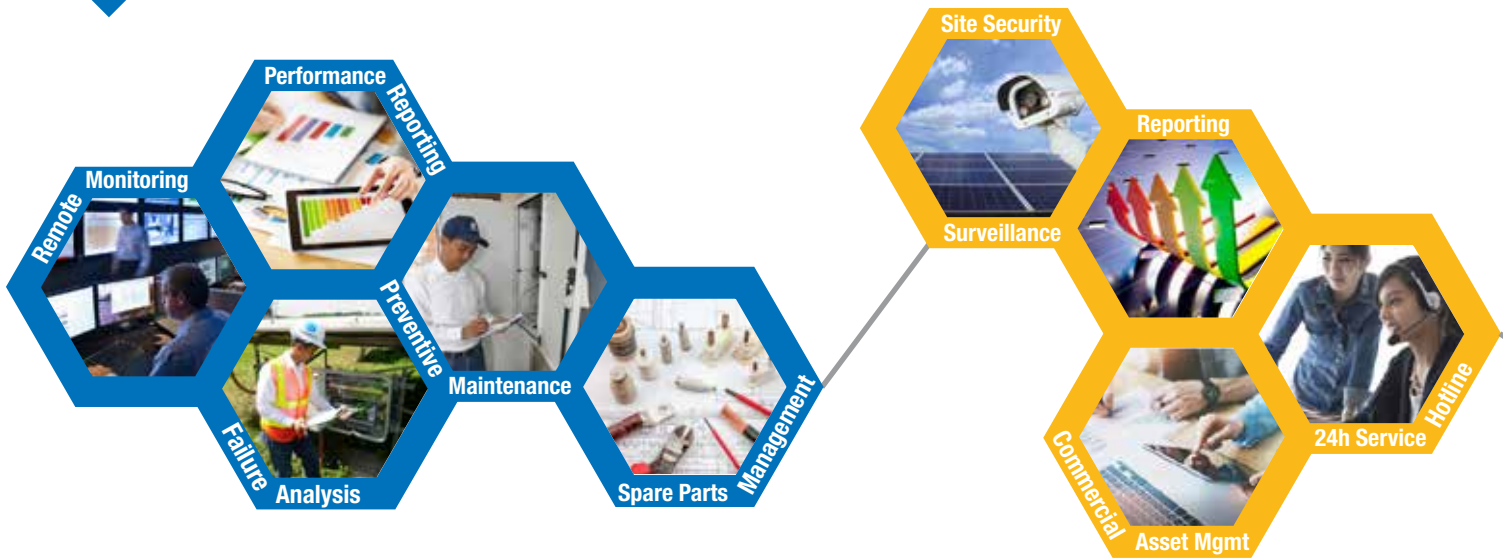

In Asia Pacific, we have provided our Operations & Maintenance services for close to half a gigawatt of solar projects.

With Conergy's comprehensive O & M service offerings, we will minimize your operational downtime and unlock the value of your power plants.

Awards

4 Benefits of Conergy's Operations & Maintenance Services

1 Maximum Yield on your Solar Investments

Conergy provides all the relevant O & M Services to ensure that your plants operate at peak performance and at a high availability rate.

Our services were developed from our extensive experience in operating hundreds of utility scale solar farms around the globe, with the processes formulated from thousands of customer engagements.

The Performance Ratio (PR) Guarantee Conergy provides on your plants:

- Start after the performance acceptance test (PAT)
- Backed by Bank Guarantees
- PR Targets are set by Conergy together with the customer and their engineering team

Over 95% of the plants we manage have exceeded their PR target ratios.

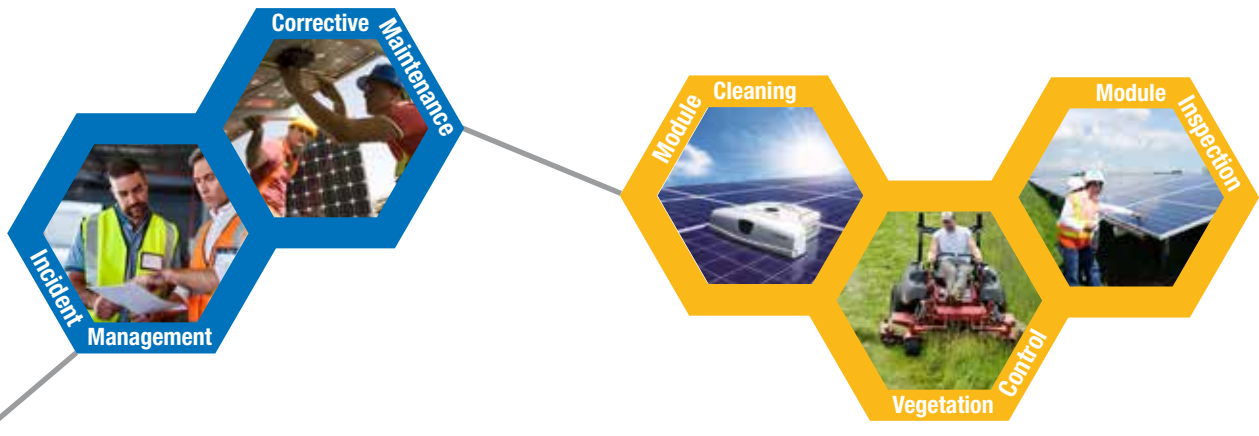

2 Reduced Repair & Replacement Delivery Times

Conergy's O & M resources are deployed locally and regionally with a fully staffed and dedicated Regional Operations Center in Manila which relieves you from the trouble of creating your own internal fault management and system monitoring team and processes.

Our teams are staffed with multi-vendor trained engineers and technicians who have extensive network operations and management expertise which means that all irregularities and plant downtimes are attended to immediately and cases are resolved promptly.

Best-in-Class O & M processes and methodology are consistently applied on all our customer engagements.

3 Automated & Advanced Analytics and End-to-End Trouble-Shooting Capabilities in Real Time

Besides being an outsourcing model where power plant owners can save 20-30% on their CAPEX and OPEX expenses, Conergy's O & M service portfolio enables you to benefit from a system-wide operational transformation of your power business including a move to a more connected, digital platform in which cloud, security, operations and analytics play a critical role in managing your operations.

Our LOCUS Intelligent Monitoring software enables us to perform comprehensive system surveillance and monitoring capabilities, along with fault diagnosis and testing.

Our cloud-based, mobile-enabled Fiix Asset Management System allows us to take corrective action and perform trouble resolution in real time. It organizes, tracks work orders and schedules all your maintenance management activities.

4 Cost Effective Investment

By leveraging on our global O & M best practices, dedicated network operations resources, vendor partnerships and the latest industry tools and innovations, you minimize your organizational complexity and lower your OPEX by eliminating internal resource investments and capital expenses.

We offer flexible service options and tailored packages that you need to transform your business and excel in your market.

Our O & M services protects your revenue stream by minimizing your operational downtime while maximizing the performance of your solar plants.

And with world class component manufacturers backing up our support services, additional protection is further provided to you.

Reference Projects in Asia Pacific

"If you are looking for a highly skilled solar O & M contractor who leverages advanced technology to care about your solar power plants as if they were their own, Conergy is the one for you."
